Art Unit: 1754

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 97-123, 130-133, drawn to a composition, classified in class 524, subclass 495.
- II. Claims 124-129, drawn to nanotubes, classified in class 423, subclass 447.1.

The inventions are independent or distinct, each from the other because:

Inventions I and II are at best related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as a hydrogen storage element. See MPEP § 806.05(d). The groups require different reagents and conditions.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different subject matter and classification, restriction for examination purposes as indicated is proper.

In order to be complete, a response must include an election, even if traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
